

NPIC/TSSG/RED-113/70
7 April 1970

MEMORANDUM FOR: Chairman, Career Service Board

THROUGH : Chief, Technical Services & Support Group

SUBJECT : PRA Assignment [REDACTED]

25X1

25X1

1. [REDACTED] has been on PRA assignment since 1967. His present assignment expires on 28 April 1970. [REDACTED]

[REDACTED] is currently serving as Deputy Chief of the Systems Research Branch, Research & Engineering Division, TSSG. [REDACTED]

25X1

[REDACTED] is a GS-14, while his position is currently slotted at the GS-13 level. [REDACTED] duties require that he replace the Branch Chief in his absence, and he serves as a senior project officer on two of the Center's larger programs.

[REDACTED] is doing a highly effective job and should not be penalized because of RED's slotting problem. The Chief of the Systems Research Branch is currently slotted at the GS-15 level, and it would appear reasonable that, as his deputy, [REDACTED] position should be slotted at the GS-14 level.

2. [REDACTED] assignment to a PRA resulted through no fault of his own but occurred as a result of NPIC's past reorganizations. This GS-14 situation was later compounded as the result of RED's recent reorganization when RED received [REDACTED] a GS-14, but only received a GS-13 slot,

making it impossible for us to alleviate [REDACTED] situation. RED is currently preparing papers developing a justification for an upgrading of [REDACTED] position. However, to solve the immediate problem, it is recommended that a one-year extension of [REDACTED] PRA be authorized to provide time for the over-all problem to be solved.
